# Adelina Dopico

UI/UX DESIGNER

Born and raised in Spain, after my studies I've had experience working in the design industry for 7 years. With a passion for telling brand stories through design, I started my career as a Visual Designer and over the years transitioned to doing pure digital design focused on user-centered approach. Having worked in the e-commerce start-up environment and also on the agency side, I have seen and experience a various range of teams and working dynamics which has enrichened my perspective and design approach.
